what is educational research what are its current approaches methods and methodologies how should existing literature be reviewed and evaluated critically what are the key philosophical debates in and on educational research how should research in education be conducted and how should it be presented and what is the value of such research with this extensively revised edition of a much admired and engaging guide jerry wellington provides clear and constructive answers to these questions complete with detailed advice on methods such as interviewing surveys documentary research and the use of focus groups thoroughly overhauled and updated this edition includes new case studies helpful theory summary boxes and a range of activities

or points to ponder to foster engagement with current issues retaining the clarity and concision of the previous edition and its approachable and practical style jerry wellington provides an invaluable text for all those engaged in educational research

with so much technical information about research methods it is easy to lose sight of the bigger picture of why we carry out educational research and where and how research might contribute to the improvement of education educational research an unorthodox introduction steps you through the wider social and political contexts of educational research focusing on fundamental questions such as what education actually is and what it is for in doing so the book raises questions that more orthodox introductions to the theory and practice of educational research often leave aside gert biesta covers a range of key issues which permeate any educational research project including the roles of theory in research what it means and takes to improve education the nature of educational practice the history of educational research and scholarship the connection between research professionalism and democracy and what the social and political dimensions of academic publishing are each chapter includes a set of questions to stimulate further discussion

cuts through the complexities of educational research to give the novice reader a sound basis to define develop and conduct study while providing insights for even the accomplished reader

educational research 6 e provides the most comprehensive introduction to the major research methods and types of data analysis used in educational inquiry today sixth edition includes extensive coverage of qualitative inquiry

this book explores educational research in terms of the relationship between epistemology methodology and practice divided into two sections the first examines the frameworks which underpin the methods educational researchers use the second looks at a broad spectrum of approaches including feminist approaches action research ethnography and biographical research the issues covered are central to all within the research community including students undertaking research degrees or research methodology courses

the chapters in this book outline the history and scope of educational research they also discuss many of the major issues at stake in current debates and exemplify the contrasting perspectives to be found in the literature this is the companion volume to educational research in action edited by roger gomm and peter woods it is one of two course readers for the open university course e824 educational research methods

education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations all over the world and particularly in the english speaking countries governments look for means of improving student achievement as measured by standardized test scores although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good

education also the research on which they are based is not the only legitimate way to do educational research social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role in this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip freedom of inquiry in educational research can no longer be taken for granted narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort this book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask how did we arrive at this place and where is educational research heading the book illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science this book could not be more timely and important nicholas c burbules grayce wicall gauthier professor university of illinois with research increasingly tied to state policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates thomas s popkewitz the university of wisconsin madison usa this publication is realized by the research community two vlaanderen research foundation flanders belgium philosophy and history of the discipline of education evaluation and evolution of the criteria for educational research

it is easy for newcomers to educational research to be confused by the wide range of terms used in the field and consequently for them to find it challenging to relate such terms to their own research and practice this comprehensive guide consists of 120 concise but illuminative essays providing an explanation and definition of the term alternative explanations and definitions of the term the context in which it is used by educational researchers exemplars as to how the term is used and used be used in practice references to further literature cross references to other terms in the book

challenges in educational research considers the quality and usefulness of educational research using 2 reports that have recently been published as a starting point well known academics expand the arguments beyond the reports themselves

conducting educational research sixth edition thoroughly addresses the major components of

research design and methodology the text is especially useful for inexperienced student researchers and doctoral students in the early stages of preparing a dissertation the early chapters of the text clearly describe the process of selecting a problem reviewing the literature constructing a hypothesis identifying and labeling variables and constructing operational definitions the later chapters assist students in refining methodological procedures analyzing data and writing the final research report the clarity of the text and the numerous practical examples help to reinforce important concepts and key ideas increasing the efficacy of the text for even the most inexperienced student researchers additionally sample studies are included as models of acceptable published research and serve as a guide against which students may evaluate their own work changes in new edition more illustrations tables figures and bulleted lists to enhance understanding more and simpler explanations of complex process a greater balance between the various approaches to research ranging from experimental to qualitative with causal comparative survey and evaluation in between part i expanded to include additional ethical considerations when conducting research part ii renamed carrying out fundamental steps of research additional details regarding measurement and observation expanded discussion of the application of design criteria part iii renamed carrying out quantitative research additional chapters on experimental research correlational and causal comparative research survey research and evaluation research
